From Diesel-Dependent to Hybrid: Optimizing Off-Grid Ready-Mix Plant Power with SENMARCK

Date: Wednesday 07th October 2026

Time: 3.00 pm to 04.30 pm

<https://zoom.us/j/94238482385?pwd=gP5H4Vu4EMa0CZSS62oHzFDnLYVuqH.1>

Meeting ID: 942 3848 2385

Passcode: 742536

Mr. Alex Sundebao
Business & Operations
Director.
Senmarck Energy Limited,
China

The Topic:

An off-grid ready-mix plant doesn't just need a battery—it needs a power system engineered around its machinery, motor-starting requirements, and actual operating profile. **SENMARCK** combines high-power battery storage, diesel generators, solar power, and intelligent energy management to transform a conventional generator-based plant into a more efficient and intelligent hybrid power system

The Faculty:

Mr. Alex Sundebao is Business Director with Senmarck Energy Limited, China. With over years of experience as a Business & Operation Director at SENMARCK ENERGY, He lead the development and delivery of innovative and sustainable energy storage solutions for residential and industrial customers. He manage key accounts, direct teams on products R&D, and supervise the whole product delivery cycle in global region.

He has a strong background in engineering and project management, coordinated large scale solar projects in various overseas markets. He also hold an business management degree from ESSEC Business School and joint IT management program from Mannheim university, with a focus on strategy and IT management. He is passionate about supporting the transition to green energy and creating value for our customers and partners. He work with integrity, collaboration, innovation, and customer-centricity.
